

# ICD改正・改訂 プラットフォーム

カン・セリック

## 主な目的

- 専門家同士のコミュニケーションを促進する
  - ・ インターネットによって広範囲の専門家が参加
- 情報の保管整理
  - ・ 継続作業
  - ・ 完了作業
- ワークフローの促進
  - ・ 改訂用に指定されたワークフローに基づいた指導
  - ・ 適正化が可能
  - ・ 粒度の細かいユーザーアクセス／役割管理

## ウェブアプリケーション

## 三重構造

## 提案ライフサイクル

## ユーザーの役割とアクセス権

- ▶ すべての人
- ▶ 管理人
- ▶ グループのメンバー
- ▶ グループの管理者
- ▶ 改正・改訂の管理者
- ▶ プラットフォーム管理者

The screenshot shows a web browser window titled "Login Page - Windows Internet Explorer". The address bar contains the URL: <http://hqsw0043131.hq.intra.who.int/icdrevision/nt/login.aspx?ReturnUrl=%2Ficdrevision%2Fdefault.aspx>. The page header features the WHO logo and the text "World Health Organization ICD Update and Revision Platform".

**Welcome to the ICD Update and Revision Platform.**

Given the mandate by the World Health Assembly in 1990 (WHA 43.24), WHO has established an updating process to incorporate new scientific knowledge and also systematically planned for a revision of the ICD by 2015 in order to enable a wider implementation of the classification.

To start this process, a revision plan has been developed after fruitful discussions with a number of WHO Collaborating Centres and other interested parties. A coordinated series of methods will be utilized to revise the current ICD-10 to arrive at a new generation of classification. [Click here for detailed information](#)

There are three consecutive steps in the revision process:

1. **ICD 10 Plus** for entering and commenting ICD Revision proposals
2. **Draft ICD -11** for comments and field trials
3. ICD -11 and terminology /ontology work

This current platform is the first step to allow all users to enter and comment on proposals for ICD revision

- U Code for immune compromised [Edit]
- U Stransky-Regala anaemia [Edit]
- U Add HbAS [Edit]

**Pneumocystis carinii becomes jirovecii**

Proposal ID : 1014 - Proposal State : Accepted Proposal for Update

Implementation Date : 1/2008

Originator : Ulrich Vogel([ulrich.vogel@dimdi.de](mailto:ulrich.vogel@dimdi.de)) - Last Update made by : Lori Moskal

Creation Date : 16-Mar-2006 19:53 CET - Last Update : 24-Jan-2007 22:14 CET

Primary Code Affected : B59

Secondary Codes Affected : B20.6

Volumes Affected : 1,3

Proposal Type : Change to a code description that enhances the description rather than changes the concept

Change Reason : Need to reflect a change in clinical terminology

Detailed Description

## VATER syndrome

Proposal ID : 1163 - Proposal State : In Open Discussion Layer  
Proposal for Update

Originator : *Ulrich Vogel* - Last Update made by : *Lori Moskal*

Creation Date : *22-Mar-2007 12:06 CET* - Last Update :  
*30-Nov-2007 18:56 CET*

Previously Discussed in the group(s):

Primary Code Affected : Q87.2

Secondary Codes Affected : Q87.8

Volumes Affected : 1,3

Proposal Type : Enhancements to the tabular list (such as the addition of an inclusion term to an existing code; the addition of an exclusion note)

Change Reason : Need to reflect a change in clinical terminology

### Detailed Description

Delete inclusion:

**Q87.2 Congenital malformation syndromes predominantly involving limbs**

Syndrome:

- Holt–Oram
- Klippel–Trénaunay–Weber
- nail patella
- Rubinstein–Taybi
- sirenomelia
- thrombocytopenia with absent radius [TAR]

–VATER

Add inclusion:

**Q87.8 Other specified congenital malformation syndromes,  
not elsewhere classified**

Syndrome:

- Alport
- Laurence-Moon(-Bardet)-Biedl
- Zellweger

VATER association

Revise code:

**VATER association (syndrome) Q87.28**

### Rationale

The VATER syndrome is known today as VATER association which means that the linkage between the different malformations is not as strong as it is in syndromes (see ref.).

Apart from this in patients with VATER association type of malformation involvement of limbs is not predominantly (see ref.).

Thus we would suggest moving VATER from **Q87.2** to **Q87.8** and adding 'association'.

**Comment attached to the vote of the user for Round 1 of year 2007.  
Voted:Can't Decide**

Agree with adding 'association' but not sure about moving to Q87.8. Also suggest adding the synonym 'VACTERL association' as an inclusion term and index entry.

06-Aug-2007 15:50 CET by **Marion Mendelsohn**

**Comment attached to the vote of the user for Round 2 of year 2007.

we agree with Julie's comment

30-Aug-2007 22:01 CET by **Robert Jakob**

**Comment attached to the vote of the user for Round 2 of year 2007.  
Voted:Can't Decide**

agree with code change, name edit and VACTERL, unless ORPHANET objects regarding the non-predominance of the limbs.

07-Sep-2007 19:04 CET by **Lori Moskal**

**Comment attached to the vote of the user for Round 2 of year 2007.**

**Voted:Can't Decide**

AGree with Julie's comments. The following excerpt is from Oski's Pediatrics:  
The nonrandom association of vertebral defects, anal defects, tracheoesophageal fistula, and renal and radial abnormalities was initially designated as VATER association, but has been expanded to VACTERL to recognize the increased incidence of cardiac and limb defects. These patients usually do not show facial dysmorphism. The presence of at least three of the features is considered necessary for diagnosis.

18-Dec-2007 15:52 CET by Michael Schopen

**Comment attached to the vote of the user for Round 3 of year 2007.**

**Voted:Can't Decide**

Trieste decision was to hold over. Thus no voting.
